**“The impulsive Kelvin-Voigt equations for two-component mixtures**  
**of viscoelastic fluids”**  
**by S.N. Antontsev, I.V. Kuznetsov,**  
**D.A. Prokudin and S.A. Sazhenkov**

We are grateful to anonymous referee for their useful comments. The paper is revised according to these comments. When justifying the estimates in Lemmas 1 and 2, the dependence of the constants on the parameters of the problem are now explicitly indicated.
